

Hello!

Your college has enabled Multi-Factor Authentication (MFA) for your student Microsoft 365 account.

This means that to sign in to your student Microsoft 365 account, you will need to setup your smart phone or phone number so it can be used to verify your identity. Setting up your phone, or phone number is simple, it takes about 5 minutes to complete, and you only need to do this once.

To learn more about why Multi-Factor Authentication is important to protect your account, please read this article: [What is: Multi-Factor Authentication](#)

To preview the steps for setting up your phone or phone number, please read this article: [Set up your student Microsoft 365 sign-in for multi-factor authentication](#)

Please Note: Your **student Microsoft 365 account**, is used to sign into these services:

- Student Email (Outlook on the Web)
- OneDrive for Business
- Microsoft Teams for Work or School
- SharePoint Online
- Your school provided Adobe Creative Cloud.
- Your school provided Webex.

If you need assistance with setting up your phone or phone number for MFA, please visit the IT Help Desk.
